PROFESSIONAL PROFILE

Software developer building practical, user-focused digital experiences. I enjoy understanding problems, learning through hands-on development and refining ideas into clear, useful products. My interests include responsive web development, product thinking and the practical use of AI to support better solutions.

EXPERIENCE

Software Development Intern 2026 - Present

CAPACITI · Salt River, Cape Town

Building practical software development skills through real-world projects, collaboration and structured problem-solving.

Software Development Learnership 2025 - 2026

JumpstartYourCareer · Mataffin, Mbombela

Developed technical foundations through structured learning, coding practice and practical experience.

Designer 2023 - 2025

Self-Employed

Created digital and canvas designs for clients, strengthening visual thinking, creativity and attention to client needs.

SELECTED PROJECTS

My NextMove AI

AI-powered decision simulation concept focused on helping people think through major life decisions with greater clarity.

RoadReady Traffic Services

Web product focused on making road-readiness information and public service support easier to access.

VarsityPath Navigator

Student-focused education tool designed to make university pathways and next steps easier to explore.
